

Webinar/Workshop Dates - 2024

These workshops/webinars will be relevant to people with developmental disabilities, their families and supporters as they think through how they might move into and thrive in a home they can call their own. Drawing from the experience of people and families who have done this before, this practical and down to earth workshop will explore the first steps to consider, the essential elements of what makes a house a home, and setting up for long term safety and success.

Please visit the relevant organisation's website in your State for detailed information about upcoming training.
